CREATE NEW LEVELS OF UNDERSTANDING

DiSC Indra's innovative model brings DiSC learning and understanding to the next level — to that of the relationship itself. It maps and measures the relationships of people, providing individuals and groups with feedback concerning the interrelatedness of different DiSC styles. *DiSC Indra* is designed to highlight areas of compatibility and incompatibility, pinpointing individuals' differences and providing insight about how to work together more effectively.

TAKE DiSC® LEARNING FURTHER

For nearly 30 years, people and organizations have used DiSC® to learn more about themselves and the impact of their behavior on others. The DiSC model explores four primary behavioral styles: Dominance, Influence, Steadiness, and Conscientiousness. *DiSC Indra* represents the integration of DiSC with the concepts and methods of Interpersonal Psychology. The result is a mathematically precise model that helps people measure and explore the interpersonal dynamics of their relationships. Using a highly developed psychometric model called a circumplex, *DiSC Indra* explains the interconnectedness of the styles and provides concrete, accurate feedback about how individuals with different styles interact.

DETAILED REPORTS PROVIDE THREE LEVELS OF INTERPRETATION

DiSC Indra's feedback reports provide insight on individuals, dyads (pairs), and groups. Explore the compatibility of specific people, teams, committees, departments — even the entire organization. Understanding which styles work best together, which can be effective, and which can hinder the group will maximize effectiveness and create synergistic environments.

ENHANCED APPLICATIONS

DiSC Indra is designed to be used in any setting where interpersonal effectiveness is key to the success of individuals and teams. Organizations use it in a variety of applications, including:

- conflict resolution
- team-building
- coaching
- leadership
